

*Science-Fiction like Star Trek expands the human imagination*

Combining fun and technical know-how is a matter of particular importance to Global Topspeaker Dr. Hubert Zitt. During his extraordinarily entertaining Star Trek lectures, he takes his audience into the vastness of space. The associate university professor and specialist author knows better than any other how to explain the future of technology in such an inspiring and imaginative way!

**Electrical engineer, associate professor of computer engineering**

*Field(s) of Expertise: Star Trek-Expert (physics, technology, sociological backgrounds)*

🗨 German, English

**PARTICIPANT COMMENT**

*„I wanted to thank you again for the great presentation you gave at our symposium. I have received very positive feedback from the audience as your talk provided an in sight into predicting technology trends in a way that people could identify with.“*

Stuart Caldwell / Procter & Gamble
